ABOUT ME

Full Stack Developer based in Lagos and the first graduate in my family, with hands on experience building production web applications using React, Node.js, Express, PostgreSQL and MongoDB. I have built a company website from scratch, worked on a cloud digital signage CMS and implemented secure Google login. My background in Agricultural Economics, data analysis and UI/UX design helps me understand real business problems and build clean, reliable solutions. I have completed NYSC and I am open to onsite, hybrid or remote roles.

TECHNICAL SKILLS

Front End: React, Vite, responsive UI implementation from Figma designs
Back End: Node.js, Express, RESTful API design, Google OAuth integration
Databases: PostgreSQL (Sequelize ORM), MongoDB / MongoDB Atlas
Deployment & Tools: Vercel (incl. serverless functions), Git/GitHub, CORS & environment configuration
Data & Design: Data cleaning & analysis, data visualization, UI/UX design (mock-ups, digital banners)

TECHNICAL EXPERIENCE

Full Stack Developer | **Telvida Technologies** *June 2026 – October 2026*

- Built and maintained the company's marketing website end-to-end: React/Vite front end and a Node/Express + MongoDB Atlas back end, deployed on Vercel with the backend running as serverless functions.
- Implemented Google OAuth login and admin panel modules for Projects, Portfolio, Products, and Schedules, plus a Testimonials carousel (Embla), a services mega-menu, and Naira currency formatting throughout.
- Developed Telvida Spark, a cloud-based digital signage CMS, on a React/Vite front end and a Node/Express + PostgreSQL (Sequelize) back end, covering Media Library, Display Management, Playlists, Scheduler, and Layout Designer modules, in collaboration with the Android/Windows player-app developer.
- Diagnosed and fixed a Promise.all destructuring bug causing incorrect dashboard stat counts, resolved hardcoded localhost URLs and CORS issues blocking production deploys, and led the GitHub repo transfer into the company org.

Full Stack Web Developer | **Enoch Louis Tech** *February 2025 – November 2025*

- Implemented RESTful APIs to facilitate communication between client-side and server-side components.
- Managed database operations, including schema design and query optimization, ensuring seamless integration with server-side logic.
- Developed and maintained scalable web applications using front-end (React, Vue) and back-end (Node.js, Python) technologies.

Data Analysis Intern | **TechCrush** *March 2025 – July 2025*

- Collected, cleaned, and pre-processed large datasets from various sources, ensuring data integrity and readiness for analysis.
- Conducted descriptive and diagnostic analyses to identify key trends, patterns, and anomalies impacting business performance.
- Assisted in building basic predictive models to forecast future trends and support strategic decision-making.

UI/UX Design Intern | **GAOZU OFFICIAL LIMITED** *March 2025 – December 2025*

- Assisted the senior design team in conceptualizing and developing UI mock-ups for website and mobile application interfaces.
- Created digital banners, social media graphics, and promotional flyers adhering strictly to brand guidelines.
- Prepared final design files for digital publication and print, ensuring correct resolution, color profiles, and file formats.

EDUCATION & CERTIFICATION

B.Agric, Agricultural Economics | **Olabisi Onabanjo University, Ogun State** *October 2019 – August 2024*

Certificate in Customer Care and Complaint Management

Certificate in Digital and Social Media Marketing

National Youth Service Corps (NYSC) | **Completed** *October 2026*
